Extra GCD

Write a program in C++ to find the Greatest Common Divisor (GCD) of two numbers.

The greatest common divisor (GCD), also called the greatest common factor, of two numbers is the largest number that divides them both. For instance, the greatest common factor of 20 and 15 is 5, since 5 divides both 20 and 15 and no larger number has this property.

Sample Output:

Input the first number: 25

Input the second number: 15

The Greatest Common Divisor is: 5

Thank You
